

Racial Segregation in my Life

Most of us live a life in which we have very little contact and almost no authentic relationships with people of different races. Think about where you go and what you do in a typical calendar cycle. How racially diverse or segregated is your life? Consider each area listed and provide an **estimated** percentage of the group's racial background.

Ex. My neighborhood ex. 60% White, 10% Asian, 20% Black, 10% Latin@

<u>Place</u>	<u>Percentage of people by race</u>
Neighborhood	
Place of worship	
Library	
Gym	
Neighborhood/child(ren)'s school	
Your job/office	
Your friend/social group	
Mode of transportation	
Your recreational places: Ex. pool, skiing, travel, boating, movie theatre, bowling, etc.. _____ _____ _____ _____	

Consider:

Are there any places where the percentage closely matches the US population or your city's population? Which places do you see your racial identity being in the majority or the minority? Do you recognize a pattern? How have your life choices affected how race shows up in your life?
